Forecast for Saturday 25 Feb 2023

Weather: A cold bright start to the day with sunny spells but then clouding over from the east. This afternoon a few bright spells are possible, but generally cloudy conditions are expected and a light wintry shower is not out of the question across eastern mountains. This evening becoming dry with some cloud breaks developing.

Chance of cloud-free hill tops above 800m: 90% falling to 70% as cloud develops.

Low Cloud and visibility: Patchy low cloud above 600m this morning will become scattered this afternoon especially around eastern hills. Visibility will be very good this morning, with distant hill visible but may turn hazier later today and moderate or poor in any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Cold northerly winds will enhance the chill effect.

Forecast for Sunday 26 Feb 2023

Weather: A dry night with some patchy cloud and clear spells will lead into sunny spells at first for the morning. However cloud will increase from the east through the morning, bringing a small probability of a light afternoon and evening showers, mainly across eastern areas.

Maximum wind: Northeasterly 10-15mph.

Chance of cloud-free hill tops above 800m: 90% falling to 80% during the afternoon.

Low Cloud and visibility: Scattered cloud above 600m around eastern areas in the afternoon, elsewhere cloud will be patchy with most summits remaining clear and good views possible. Visibility will dip for a short time in any showers.

Temperature: **Valleys:** Plus 2 rising to 7 Celsius.
At 800m: Minus 3 rising to Plus 1 Celsius.
Freezing level: 400m rising to 800m.
